Difficulties encountered during this assignment:

One of my main difficulties was to arrange the elements of the Main Page card correctly, as it was difficult to place them correctly. I also had trouble at first with navigation - I didn't know the concept beforehand - but thanks to a few videos like this one and some websites I was able to understand, and this enabled me to do the navigation correctly. Another challenge was finding the right images for the film.

To test it out, I decided to try it out on my phone, as I had a lot of problems when I tested it on virtual devices. My computer would crash too often or my screen would freeze for several seconds.
